.40s ARE THE NEW .50s

FASTER, FLATTER, FARTHER.

What do we mean when we say “the .40s are the new .50s”? Quite simply, we mean that when it comes to long-range muzzleloading performance, the old .50 calibers are history. And that’s because our new .40 and .45 caliber muzzleloaders will outperform any .50 (or .54) caliber muzzleloader on the planet.

For example, our Paramount .40 caliber can produce muzzle velocities up to 2740 FPS with a max charge of Blackhorn 209[®] propellant. That incredible speed produces as little as 26” of drop at 400 yards. And the .45 is not far behind at 2650 FPS and 31.6” of drop at 400. Combine those velocities with sub-MOA accuracy potential and you’ve got performance capabilities comparable to high-powered center-fire rifles – from a muzzleloader!

So, if you live in a state where .40 caliber is legal for deer, and that would be 26 of them at present, you are in luck. And if you don’t live in one of those states, .45 is legal for deer-sized game in every one of them, and even for elk in some. Either way, CVA’s .40 and .45 caliber muzzleloaders are faster, flatter, and more accurate than any .50 caliber you can buy.

PARAMOUNT VELOCITIES W/POWERBELT BULLETS ELR SERIES

*At the time of printing. Always check your local laws and regulations for the most current legal weapons of take.

PARAMOUNT™ SERIES

The rifles of the PARAMOUNT™ Series are unlike any other muzzleloading rifles on the market. These guns were specifically developed and designed to handle “super-magnum” propellant charges of 150 to 170 grains by volume of Blackhorn® 209 – and thus provide muzzle velocities comparable to centerfire rifles. In fact, our newest PARAMOUNT PRO and PARAMOUNT HTR .40 caliber offerings are capable of muzzle velocities as high as 2740 FPS - producing a 400-yard drop of only 26 inches with Powerbelt’s ELR bullets! Combine speeds like this with the precision accuracy of the nitride-treated, stainless steel Bergara Barrels®, and you have the most long-range capable production muzzleloaders ever made.

PARAMOUNT™ PRO

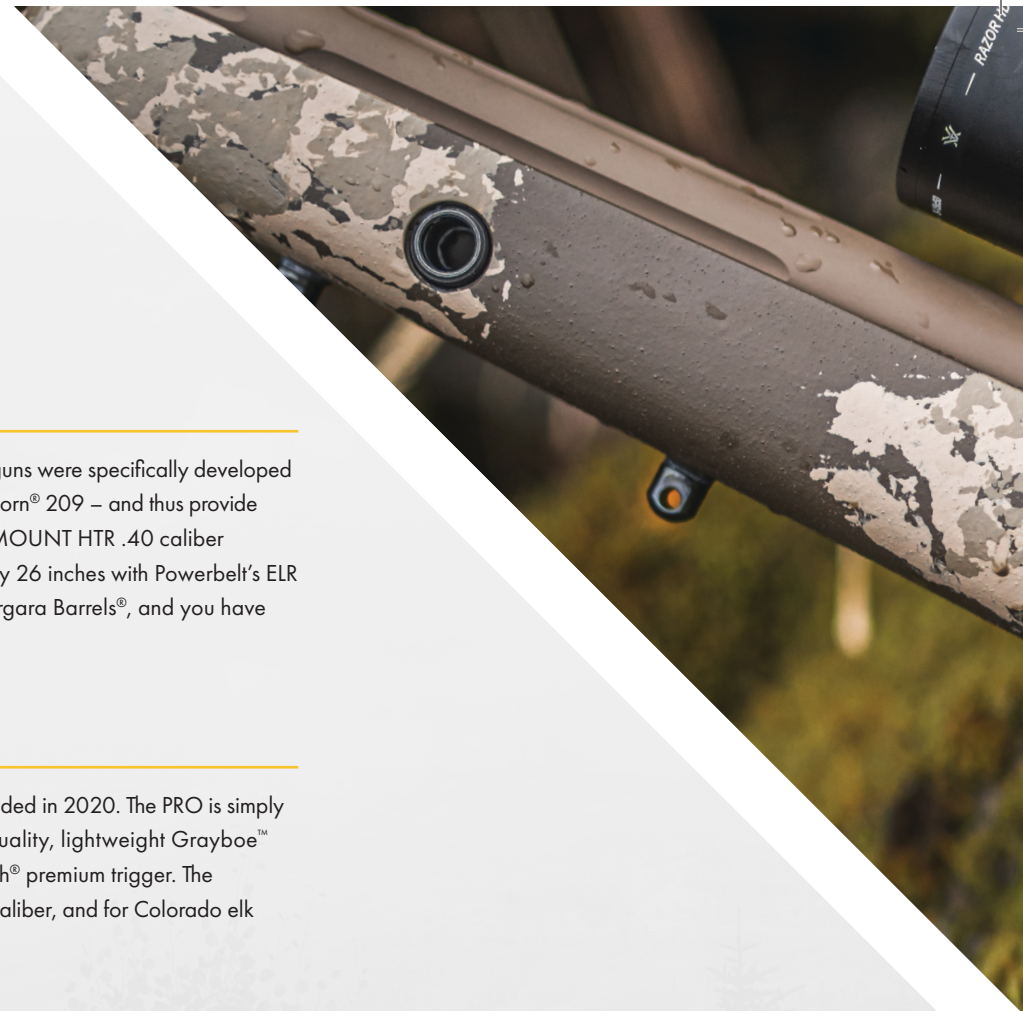

The PARAMOUNT™ PRO proved to be a popular addition to the PARAMOUNT Series when it was added in 2020. The PRO is simply an upgraded version of the PARAMOUNT, with the same barreled action, but adding a custom-quality, lightweight Grayboe™ Fiberglass Stock in hand painted camo, a matching Cerakote® finish for the barrel, and a TriggerTech® premium trigger. The PARAMOUNT PRO is available in the new super fast and flat shooting .40 caliber, our standard .45 caliber, and for Colorado elk hunters, a specially configured .50 caliber version equipped with a Williams® peep sight.

PARAMOUNT™ HTR

The PARAMOUNT™ HTR is the latest addition to the PARAMOUNT Series for 2021. The HTR is identical to the PARAMOUNT except for its stock, which is of a more hunting oriented function design than the stock used on the original PARAMOUNT, plus it is dipped in the new Realtree® Hillside™ camo pattern. While this stock is slightly lighter than that of the PARAMOUNT, it still has an adjustable comb, for perfect eye-to-optic alignment, and the internal aluminum chassis that provides a rock-solid foundation for the barreled action. The PARAMOUNT HTR is available in both .40 and .45 calibers.

PARAMOUNT™

Incredibly fast muzzle velocity is what made the PARAMOUNT™ .45 the talk of the industry when it was first introduced in 2019, but speed is worth nothing without the accuracy to put those shots where they belong. And with its nitride treated, stainless steel Bergara® barrel, combined with its internal chassis and fully adjustable stock, the PARAMOUNT does just that. Paired with PowerBelt’s 285 grain ELR bullets, which were specially designed for the PARAMOUNT, this rifle can produce incredibly tight groups at ranges previously thought unreachable for a muzzleloader. Available in .45 caliber only.

BARREL BORE GUARANTEE

If your Nitride barrel ever develops permanent bore damage due to corrosion, it will be replaced at no charge, for life.

ACCURACY GUARANTEE

Featuring a genuine Bergara Barrel with the strongest accuracy guarantee in our industry.

ACCURA® X-TREME SERIES

The ACCURA® Series of rifles provide a level of overall performance and ease-of-use that is unequalled by any other break-action muzzleloaders on the market today. Accuracy has always been a given in CVA's ACCURA series rifles because all are equipped with premium, custom quality Bergara® barrels, which are widely recognized as the most accurate production muzzleloader barrels in the world. The new ACCURA LR-X and MR-X offer features never before seen in production muzzleloaders – like quick-take down design for easy cleaning and compact transport, a carbon-fiber collapsible loading rod that eliminates the accuracy robbing necessity of hanging a ramrod under the barrel, an adjustable comb for perfect eye-to-sight alignment with open sights or optics, fast rifling twists for optimal performance with modern projectiles and propellants, and a threaded muzzle which allows the use of CVA's Paramount Muzzle Brake for magnum charge shooting with minimal recoil. Both the LR-X and the MR-X are available in the fast shooting .45 caliber, and if you hunt in a state where .50 caliber is still required, it is also offered in both models. Plus, each Accura X-Treme features SoftTouch finish for easy gripping, even in the harshest weather conditions.

ACCURA® LR-X

The ACCURA® LR-X is our longer barreled ACCURA muzzleloader (the LR stands for "Long Range"), featuring a 30" Nitride treated stainless steel Bergara Barrel. The LR-X is designed for the hunter that wants the extra velocity that longer barrels provide, making longer range shots a bit less difficult due to decreased drops. Perfect for the western plains or eastern bean fields, the ACCURA LR-X is available in Veil™ Wideland camo or Realtree® Hillside™ camo, both with matching Cerakote™ barrel finishes.

ACCURA® MR-X

The ACCURA® MR-X is our shorter-barreled ACCURA muzzleloader (the MR stands for "Mountain Rifle") and features a 26" Bergara Barrel in either bare stainless steel or Nitride® treated stainless steel. The MR-X is designed for hunters seeking a rifle that is both light to carry in the mountains and easy to maneuver in tight situations – like thickets or tree stands – yet still capable of reaching on out there when necessary. The ACCURA MR-X is available in Veil® Alpine™ or Realtree® Rockslide™ camo with matching Cerakote® barrel finishes, or a basic black stock with stainless steel.

BARREL BORE GUARANTEE

If your Nitride barrel ever develops permanent bore damage due to corrosion, it will be replaced at no charge, for life.

ACCURACY GUARANTEE

Featuring a genuine Bergara Barrel with the strongest accuracy guarantee in our industry.

OPTIMA® V2

Modeled after CVA's long popular ACCURA® V2, the OPTIMA® V2 rifles feature the same trigger-guard actuated breeching lever, internal parts, and trigger. The barrels are constructed of stainless steel and are offered in either the standard bare stainless or treated with our state-of-the-art Nitride® rust-proofing process. Add in CVA's Quick-Release Breech Plug (which is finger removable), 100% ambidextrous stock, and a CrushZone® recoil pad, and you've got a gun with more quality features than any other muzzleloading rifle in its price range.

Equipped with a 26" or 28" barrel, the OPTIMA V2 is both easy to maneuver in the tree stand and comfortable to carry in the mountains. It comes standard with a DuraSight® DEAD-ON™ one-piece scope mount or DuraSight fiber optic sights, and CVA's solid aluminum PalmSaver™ ramrod.

BARREL BORE GUARANTEE

If your Nitride barrel ever develops permanent bore damage due to corrosion, it will be replaced at no charge, for life.

CASCADÉ™ SERIES

The CASCADÉ™ is CVA's first ever bolt-action centerfire rifle. Long the leader in both muzzleloading rifles and single-shot centerfires, CVA® has applied its nearly 50 years of experience into making what we feel to be the best bolt-action on the market at \$800 or below.

The CASCADÉ's 4140 carbon steel barrel is offered two Cerakote® finishes, Flat Dark Earth and Graphite Black (Short Barrel series only). The series features a threaded muzzle, making it ready for a brake or suppressor whenever you are. The bolt design incorporates a 70° throw for smooth and fast operation, plus generous scope clearance. The two-position safety is conveniently located for natural and instantaneous operation. And loading is a breeze with its flush-fit, detachable magazine.

Our own synthetic stock is fiberglass reinforced and has a SoftTouch finish for easy gripping, even in the harshest weather conditions, and it is dipped in the Veil® Wideland™ camo pattern. The buttstock has adjustable length of pull by way of a removable spacer – making the CASCADÉ an ideal gun for still-growing youths, small-statured adults, or even the full-sized hunter who wants to shorten their stock to accommodate heavy winter clothing. And dual front swivel studs allow for the use of both a sling and a bipod at the same time.

Scoping the CASCADÉ is a breeze, as it comes standard with a two-piece mount. Cascade rifles are currently offered in two different configurations. The Standard CASCADÉ in 20", 22", 24" and 26" length #3 contour barrels, and the CASCADÉ SB (Short Barrel) in 16.5" and 18" lengths with a #4 contour.

SCOUT™ & SCOUT™ TD CENTERFIRE RIFLES

For the hunter who wants a high-quality single shot rifle, the SCOUT™ is the ideal choice. Its sleek, lightweight, and easy-to-operate design sets a new standard for affordable single shot hunting rifles. The composite stock is lightweight, 100% ambidextrous, and features CVA's CrushZone® Recoil pad – a real plus for heavier calibers like the .35 Whelen. Every SCOUT model is perfectly balanced making the gun incredibly quick to aim and shoot. All SCOUT rifles include a DuraSight® scope rail, which will accept most any standard scope rings found on the market today.

The SCOUT™ TD comes with either a 22" or 25" (heavier calibers) fluted stainless steel barrel. Featuring quick-take-down and tool-free disassembly, it's also a great stowaway emergency/survival gun for the camp, boat, or truck. Plus, all SCOUT TD rifles feature a genuine DuraSight® scope rail.

The SCOUT™ models, all black stocked and with blued carbon steel barrels, are our most basic break-action centerfire rifles, but are plenty of gun to get the job done for the budget-minded hunter. Whether you are looking for a youth's first hunting rifle or a compact truck, camp or brush gun, the SCOUT is a both a great performing and extremely affordable choice.

DuraSight® Z2® Alloy Fiber Optic Sights

The ultimate in visibility and durability - these sights are guaranteed for life!

AC1622 - CVA/Traditions In-Lines	\$36
AC1628 - CVA OPTIMA Pistol	\$33

In-Line /Sidelock Combo Nipple Pick

Heavy wire mounted in a solid brass handle works on all blackpowder rifles.

AC1582	\$8
--------	-----

Straight Line Capper

All brass rectangular tube eliminates problems with tipped or jammed caps. Holds fifteen #11 caps.

AC1407	\$8
--------	-----

Rifle/Pistol Nipple Wrench

Has removable cap with nipple pick. Ideal for cleaning fouling from nipple. Not for in-lines.

AC1488	\$6
--------	-----

Williams® Peep Sight

For Wolf, Optima, and Accura models.

AC1735	\$45
--------	------

QRBP Breech Plug Clean Out System

Hand turned drills allow easy and complete cleaning of both the large and small fire channels of CVA QRBP breech plugs.

AC1631	\$28
--------	------

Muzzleloader Firing Pin Removal Tool

One end of the tool allows you to remove the firing pin bushing so you can clean the firing pin, firing pin spring, and bushing. The other end of the tool assists with removing spent primers from the breech plug.

AC1695	\$5
--------	-----

Trophy Bullet Starter™

Quiet, non-abrasive, non-glare polymer. Short and long starter is recessed to fit over most bullets.

AC1558	\$5
--------	-----

KnuckleSaver™ Bullet Starter

Special design starting rod eliminates bruised knuckles and pinched fingers. Also attaches to ramrod as a handle/extension or palm saver.

AC1428	\$26
--------	------

Paramount™ Replacement Breechplugs

Replacement Paramount breechplug for the VariFlame adapters.

AC1718 - VariFlame, .45/.50 Cal	\$26
AC1719 - 209, .45/.50 Cal	\$26
AC1738 - VariFlame, .40 Cal Only	\$19

Replacement Breech Plugs

Replacement breech plugs are the same reliable designs and quality that come standard with all CVA rifles.

AC1679 - #11 & Musket	\$16
AC1678 - 209 for Standard In-Lines	\$18
AC1678A - 209 for Optima & Kodiak	\$18

Replacement Quick Release Breech Plugs

Stainless Steel replacement breech plugs for 2010 and newer break-action models for Accura, Optima, and Wolf.

AC1611 - Standard (pelletized or Triple7 loose powder)	\$30
AC1611BH - Blackhorn 209 Breech Plug	\$44

SHOOTING ACCESSORIES CONTINUED

**NW Conversion Kit**

Easily convert your 209 CVA Muzzleloader to shoot musket caps.

AC1697	\$48
--------	------

**Replacement Quick Release Breech Plugs - Black**

Stainless Steel replacement breech plugs for 2010 and newer break-action models for Accura, Optima, and Wolf.

AC1651 - .45/.50 Caliber (pelletized or Triple7 loose powder)	\$38
AC1651BH - .45/.50 Caliber BH209	\$52

**209 Conversion Kit**

Conversion kit to make your NW CVA Muzzleloader able to shoot 209 primers.

AC1696	\$34
--------	------

**QRBP VariFlame Conversion Kit**

Only recommended for Accura MR-X & LR-X models.

AC1737	\$82
--------	------

**Rapid Loader**

Straight-through tube allows for loading ball, patch and powder in one fluid motion. Package of 3.

AC1556 - .45 Cal	\$5
AC1556A - .50 Cal	\$5
AC1556B - .54 Cal	\$5

**Magnum Speed Loader**

This loader will handle a magnum load plus any bullet. Package of three.

AC1617 - .45	\$6
AC1617A - .50	\$6

**Universal Speed Loader**

Clear florescent orange design to hold bullet and powder in separate compartments. Lid accommodates either a 209 or VariFlame adapter.

AC1509	\$7
--------	-----

**Universal Speed Loader Pouch**

Speed pouch installed on buttstock to hold 2 universal speed loaders.

AC1728 - with 2 loaders	\$22
AC1729 - Pouch only	\$16

**Powder Funnel Top for Pyrodex®**

Snap on cap replaces blackpowder lid. Eliminates spills as it allows user to visualize pouring.

AC1385	\$6
--------	-----

RAMRODS & CLEANING SUPPLIES

**Shooting Patches**

Tight woven and resistant to burning. Helps improve accuracy. .015 thickness, Qty 100.

AC1447	\$3
--------	-----

**Pre-Lubricated Shooting Patches**

Tight woven and resistant to burning. Brings out the most in accuracy. .015 thickness. Qty 200.

AC1439A - .50 - .58 caliber	\$12
-----------------------------	------

**Cleaning Patches**

Two-inch cleaning patches are a perfect fit over a CVA cleaning jag.

AC1455A QTY. 100	\$6
AC1455B QTY. 200	\$8

**Ramrod Accessory Pack**

Cleaning brush, cotton bore swab and cleaning jag/loading tip.

AC1466A-.45	\$7
AC1466B-.50	\$7

RAMRODS & CLEANING SUPPLIES CONTINUED

Nylon Cleaning Brush

The perfect follow-up brush to wire brushes. Removes the smaller fouling particles.

AC1683 \$3

Patch Puller - Universal Caliber

Ramrod attachment for removing patches stuck in barrel bore.

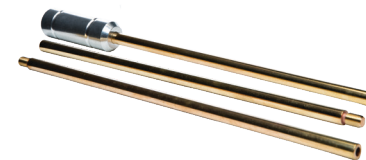

AC1460 \$5

Trophy Ramrod™

Five times stronger, non-abrasive ramrods are not affected by water, oil, alcohol, salt, or most acids.

AC1531 Universal \$12

Lifetime Range Rod

Made of solid steel and brass. The only range and cleaning rod you'll ever need - guaranteed.

AC1633 \$39

In-Line Breech Brush Set

Designed to loosen powder fouling that accumulates after shooting. Large brush cleans breech area while small brush cleans breech plugs.

AC1612 \$4

Bullet Puller

Screw head ramrod attachment for removing lodged projectiles from barrel bore.

AC1461 \$3

PalmSaver™ Replacement Ramrod

Various lengths available for CVA, T/C, and Traditions rifles. Visit cva.com for complete listing.

\$32

Palm Saver

Simple, inexpensive accessory for easier, more comfortable loading and cleaning.

AC1498 \$5

Cleaning Brush

Wire cleaning brush to loosen the toughest fouling.

AC1463D - .40 \$3

AC1463 - .45 \$3

AC1463A - .50 \$3

AC1463B - .54 \$3

Breech Plug Cleaners (50 pack)

Flexible felt-covered wire cleaners reach hard to get to places.

AC1615 \$5

Fiberglass Ramrod

Flexibility to bend without breaking. Three foot length for you to custom fit. 11/32" diameter. 10-32 threads.

AC1470 Universal \$12

AC1473 .50 \$20

Cleaning Jags

Brass cleaning jags fit all CVA ramrods.

AC1462A - .50 / AC1462 - .45 / AC1462D - .40 \$5

AC1657A - 3" Extension Jag - .50 \$9

AC1657 - 3" Extension Jag - .45 \$9

Double-Ended Parts Cleaning Brush

Allows thorough cleaning of heavily fouled places such as breech plugs, firing pins, frame surfaces, etc.

AC1629 \$4

Cotton Swab

Plush cotton swabs attach to ramrod for quick cleaning jobs.

AC1586 - .50 Caliber \$3

AC1587 - .54 Caliber \$3

Range and Cleaning Rod

32" ramrod threaded on both ends with a T-Handle, making it great for cleaning and range use.

AC1530 \$17

Carbon Fiber Collapsible Ramrod

For Paramount and Accura LR-X/MR-X.

AC1727 - .45 Caliber \$83

AC1740 - .50 Caliber \$83

AC1741 - .40 Caliber (Paramount Only) \$83

Barrel Blaster® Rust Prevent Patches

The final step in the Barrel Blaster cleaning process protects the bore from corrosion.

AC1689 - 100 qty. \$9

Barrel Blaster® Rust Prevent Spray

A liquid rust and corrosion preventative for protecting the metal on your gun during storage or foul weather.

AC1681 - 2 oz. \$10

Barrel Blaster® Solvent Spray

Use to wet cleaning patches for swabbing the barrel or with a parts cleaning brush to remove fouling from gun parts.

AC1685 - 12 oz. \$12

Slick Load™ Barrel Blaster® Solvent

Made of solid steel and brass. The only range and cleaning rod you'll ever need - guaranteed.

AC1437 - 4 oz. \$6

Barrel Blaster® Wonder Gel Solvent

Ammonia-based cleaning gel keeps the cleaner right where you want it for the removal of lead, copper and plastic fouling.

AC1684 - 4 oz. \$15

Barrel Blaster® Quick Clean Patches

Cleaning patches that are pre-saturated with Barrel Blaster Solvent for quick easy cleaning of your barrel at the range or at home.

AC1687 - 100 qty. \$11

Breech Plug Anti-Seize Stick

No more mess while taking care of a very important step. Stick applicator allows you to apply the Anti-Seize directly on the threads without getting it on your hands.

AC1682 \$7

Barrel Blaster® Solvent

Economy-sized bottle liquid black powder solvent.

AC1660 - 8 oz. \$6

Barrel Blaster® Parts Soaker

Use to soak breech plugs and nipples, or any other small heavily fouled parts.

AC1686 - 4 oz. \$10

Barrel Blaster® Foaming Bore Cleaner

Absolutely the easiest way to clean your muzzle-loader! Spray the foam into the barrel and leave in the barrel for a minimum of one hour, then swab foam out of the barrel and you are done!

AC1688 - 8 oz. \$13

Barrel Blaster® Cleaning System Value Pack

The top five items from the Barrel Blaster System together in one kit. The perfect answer for easy cleaning of your muzzleloader.

AA1850 \$47

Breech Plug® Nipple Grease

Formulated to withstand heat created during the ignition of powder. Prevents nipple and breech plug from seizing up. 2 oz. tube.

AC1670 \$5

POWERBELT BULLETS™

ELR SERIES EXTENDED LONG RANGE

THE BEST POWERBELT BULLETS EVER!

CVA and PowerBelt joined forces to develop the ELR (Extended Long Range) bullets specifically for the PARAMOUNT super-magnum rifles, but they can provide superior long-range performance in any .40, .45, or .50 caliber muzzleloader.

Critical to the ELR's long-range potential is the high ballistic coefficient as compared to other muzzleloading projectiles. Due to their longer length and aggressively tapered shape, the ELRs deliver BCs up to .360 in .40 caliber, .333 in .45 caliber, and .312 in .50 caliber. This is achieved by incorporating a large hollow point cavity which eliminates lead from the core, allowing the bullet to be lengthened without adding excess weight. This hollow core is then filled by the tail of the polycarbonate ballistic tip, which offsets the tendency of the bullet to expand too rapidly.

The addition of a hardening agent to the copper plating makes ELRs capable of delivering controlled expansion even with the super-magnum loads used in the Paramount rifle. But testing with standard loads also revealed the ELR bullets to be excellent performers at conventional velocities.

Bottom line, regardless of the gun you shoot or the powder charge you use, the PowerBelt ELR Series are the best PowerBelt bullets ever!

1. Polycarbonate tip preserves aerodynamic integrity and prevents premature expansion
2. Smooth plated finish reduces standard deviation between shots for superior accuracy
3. Larger diameter gas check for tight seal
4. Larger hollow point cavity reduces weight and maximizes internal expansion
5. Longer Length combined with aggressively tapered shape
6. Flutes in gas check make it easier to load
7. Scores inside gas check allow positive release when bullet exits barrel

Designed for Maximum Long-Range Performance on Medium to Heavy Game. (Deer, Antelope, Elk)

IMPORTANT SAFETY REMINDERS

BEWARE OF LOADING GIMMICKS

Many new shooters are coming into muzzleloading and with the constant changes in terminology, it is more important than ever for all muzzleloader users to understand how to safely load and shoot their muzzleloader.

NEVER USE SMOKELESS POWDER IN ANY MUZZLELOADER

Some manufacturers, including CVA, are now offering guns that are designed to shoot heavier than standard powder charges and/or projectiles. New shooters may become confused by the advertising for these rifles and attempt to use heavier charges and/or projectiles in older guns, which were not designed to handle the resulting high pressures. Even some experienced shooters have made this mistake. Some have also used what is known as a "duplex load," which is a mixture of blackpowder and smokeless powder. Any percentage of smokeless powder in a duplex load may create pressures almost equal to pure smokeless charges and could cause a blackpowder gun to explode. **Make no mistake about it — these loading practices can be incredibly dangerous!** All shooters need to fully understand the recommended loads for each blackpowder gun they own. If you have any questions, call CVA Customer Service at 770-449-4687 or watch the Muzzleloading Basics video at cva.com. Be safe, not sorry.

SUPPORT, REPAIRS & PARTS

CVA has a highly trained team of gunsmiths and Customer Service Reps to serve your needs. Should your gun ever need any repairs we will do our best to make sure you get it back and it shoots just like new and in time for your next hunt. Even for problems resulting from abuse or accidental damage and not covered by the CVA Lifetime Warranty, we can make the necessary repairs for a very reasonable charge.

With our complete inventory of replacement parts, our experts can repair all CVA in-line rifles, bringing them back to their original specifications. In addition to the specified repairs, each gun receives a thorough inspection. Following repair, your Lifetime Warranty is reactivated in full. We also make every effort to handle your repair request in a timely manner. CVA will pay the return shipping charges on warranty repairs. Unsurpassed repair service is just one more reason to choose CVA.

CVA makes every effort to ensure that the information in this catalog is correct and accurate. However, continuous product refinements and design changes may result in revisions to models that may not be shown in this brochure. We reserve the right to make changes in specifications, models, features, materials and colors at any time. Any and all errors in prices, descriptions and photos are subject to correction. State and local laws and regulations may affect or govern purchases of items in this catalog. Please consult with your state and local authorities. All prices shown in this catalog are suggested retail prices.

VOLUNTARY RECALL REMINDER

In August of 1997 CVA implemented a Voluntary Recall of In-Line rifle models with serial numbers ending in -95 or -96. If you have a CVA In-Line model with such a serial number do not use or allow anyone else to use the gun. If you have one of these rifles, call CVA immediately at 770.449.4687 for complete details and a free replacement gun.

Example Serial #: XX-XXXXXX-95 or XX-XXXXXX-96.

In May 1999 Blackpowder Products, Inc. purchased the assets of Connecticut Valley Arms, Inc. and now operates under the trade name of Connecticut Valley Arms and/or CVA. Any claims relating to the above described Voluntary Recall should be addressed to Connecticut Valley Arms, Inc. not Blackpowder Products, Inc. Blackpowder Products, Inc. assumes no liability for any products manufactured prior to January 1, 1998.

To order parts, submit your order with product numbers, name, address, city, state, zip and daytime phone number along with payment by check, money order or credit card information (Visa, Mastercard, Discover or American Express). Please include shipping and handling charges with your payment. You can mail your order and payment to: CVA 1270 Progress Center Ave. Suite 100 Lawrenceville, GA 30043, 770.449.4687, Fax: 770.242.8546 or visit cva.com for more details.
